DETAILED ACTION

Response to Preliminary Amendment

The examiner will like to acknowledge the cancellation of claims 2-24 in the preliminary amendment filed on Dec. 1, 2003. Claim 1 is the only claim pending in this application.

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the mailing address of each inventor. A mailing address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The mailing address should include the ZIP Code designation. The mailing address may be provided in an application data sheet or a supplemental oath or declaration. See 37 CFR 1.63(c) and 37 CFR 1.76.

It does not identify the city and either state or foreign country of residence of each inventor. The residence information may be provided on either on an application data sheet or supplemental oath or declaration.

Specification

2. The disclosure is objected to because of the following informalities: on page 1, paragraph [0001], after amending portion "July 25, 2003" add --now U.S. Patent 6,657,455--, after "January 30, 2002" add --now abandoned--, after "October 30, 2001" add --now U. S. Patent 6,456,103--.

Appropriate correction is required.

Double Patenting

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101, which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,657,455. This is a double patenting rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wohlfarth (6232759), and Eldridge et al (6456103 & 6657455) disclose a method and apparatus for supplying current to device under test.
